

Through its sister company, Arabian Chemical Terminals Ltd (ACT) , Chemtrade is able to import liquid chemicals in bulk form using its Charter of Affreightment contracts with bulk chemical shippers. Chemtrade stores the chemical products at ACT's bulk liquid chemical terminal at Yanbu , Saudi Arabia, for further distribution in the GCC region. This allows the customers to reduce their inventory stock at their sites , freeing up cash for their other operations. Chemtrade was the first chemical distributor with bulk capability and remains the only one in Saudi Arabia.
